Positive steps

Scottish Water is looking to find out how we can work with you to take positive steps towards reducing Scotland's energy use by using water wisely. This project is one of a number of innovative water efficiency projects currently being undertaken to help deliver value and services for our customers.

Home Energy Scotland is funded by the Scottish Government and delivered by the Energy Saving Trust.

For clear and impartial advice call Home Energy Scotland FREE on **0808 808 2282** or visit homeenergyscotland.org

All information and data captured from this trial is being stored by Etive Technologies Ltd on behalf of Scottish Water and the Energy Saving Trust. This project is only looking at water use patterns within households and how water efficient fixtures and fittings can help occupants to use water more wisely. Scottish Water will use the information for the purposes of understanding patterns of water use and the Energy Saving Trust for the purposes of advising participants in the trial. No information will be sold or passed to external parties unconnected to this project. Etive Technologies Ltd are registered under the Data Protection Act 1998, registration number Z2859330.

a difference**

Water and energy efficiency

Scottish Water is keen to get a better understanding of how our customers across Scotland use water in and around their homes and which water efficiency measures are most effective.

Doing the right thing

We want everyone to use water wisely every day, in the same way they think about saving energy and recycling - it should be second nature.

The environment

Scottish Water is committed to acting responsibly in the way in which we deliver services, promoting the importance of using water wisely. The goal is to deliver a service that protects the environment, whilst delivering quality and value for our customers.

The Water Efficiency Trial

What's involved?

A water monitor would be installed outside your house and you won't need to do anything. We will monitor your water usage during the project, and there will be no need for us to come back to your home to take readings as they will be automatically sent to the project team.

Benefits

You will be helping us to understand how water is used in and around homes so we can determine the best ways to help people save water. In addition you will also receive free advice to help you save energy and a free energy saving device.

This trial will help shape Scotland's water and energy efficiency policy in future years.
